And the Eddy is not only a durable and economical refrigerator for the family; its use is a valuable safeguard against disease. Food kept in a refrigerator where germs lurk in the cement joints (or in a porous WOOD lining) endangers the lives of all who eat it. Fad or fancy should not enter into the purchase of a refrigerator when human lives depend on sanitary conditions. The Eddy is the SAFE refrigerator, and its use is, in large measure,

"health insurance." The same amount of time required to clean a porcelain or glass refrigerator will keep an Eddy zinc-lined refrigerator sweet and clean.
